

Randomized trial of primary debulking surgery versus neoadjuvant chemotherapy for advanced epithelial ovarian cancer (SCORPION-NCT01461850)

Fagotti Anna, Ferrandina Gabriella, Vizzielli Giuseppe, Pasciuto Tina, Fanfani Francesco, Gallotta Valerio, Margariti Pasquale, Chiantera Vito, Costantini Barbara, Gueli Alletti Salvatore, Cosentino Francesco, Scambia Giovanni

To investigate whether neoadjuvant chemotherapy followed by interval debulking surgery is superior to primary debulking surgery in terms of post-op complications and survival, in advanced epithelial ovarian with high tumor load

NACT and PDS have the same efficacy, when used at their maximal possibilities, but come with different toxicities
