

Supplemental Table S2. Multivariate analysis of factors that influence recurrence-free survival by FIGO IB endocervical adenocarcinoma substage

Variable*	Stage IB1			Stage 1B2			Stage 1B3		
	Recurrence-free survival HR	95% CI	p	Recurrence-free survival HR	95% CI	p	Recurrence-free survival HR	95% CI	p
HPV status	1.10	0.12-9.43	0.93				5.07	1.55-16.66	0.007
Histologic grade				1.38	0.68-2.81	0.37			
Lymph-vascular invasion	5.18	1.30-20.68	0.02	3.18	1.03-9.76	0.043			
Precursor lesions	2.67	0.88-8.06	0.08						
Lymph node metastases	1.28	0.35-4.73	0.70	2.97	1.17-7.54	0.021	4.16	1.36-12.67	0.012

FIGO, International Federation of Gynecology and Obstetrics; HPV, human papillomavirus

*Multivariate analysis only includes factors that are significant in univariate analysis. Grey areas indicate factors that were not significant on univariate analysis.
